

ViSiCAST Meeting Report: Deliverable 2-1

Project Number:	IST-1999-10500
Project Title:	ViSiCAST
	Virtual Signing: Capture, Animation, Storage and Transmission
Document Type:	Meeting Report

Purpose of Meeting:	Discussing D2-1 and approach for rest of WP2
Dates of Meeting:	March 8 th 2000
Venue of Meeting:	IvD (NL)
Work-Package(s):	WP2 (Multimedia and WWW-applications)
Participants(s):	John Glauert (UEA) Ralph Elliott (UEA) Mike Lincoln (UEA) Thomas Hanke (UH) Sanja Rankov (Televirtual) Han Frowein (IvD) Margriet Verlinden (IvD)

Summary:

Deliverable 2-1

- The weather forecast was taken as domain of the application (D2-1) and it was decided to add no parallel source of information (graphics).
- A detailed planning and division of labor was worked out.
- The overall structure of the implementation of del.2-1 was discussed and decided on.

Offer of Mike Haugh to use his website for beta testing

The offer of M.Haugh was considered. It was decided that appointments with him will not be made at this moment but possibly later (as part of WP8 rather than WP2).

Demonstration by Televirtual

The participant from Televirtual demonstrated the software and the installation of the software of the last avatar ("Dan"). Participants from UH and IvD were given a copy of the software.

Platforms

It was agreed upon that the products of WP2 should be compatible for more than one platform, but in the first year we will work only on compatibility for Windows with Internet Explorer.
